

DRAFT FORM: Respiratory Specimen Request Form

Specimen Type: Histology

Lung biopsy Bronchial biopsy Pleural biopsy

Specimen Type: Cytology

EBUS

Station.....Size in mm..... No of passes StationSize in mm..... No of passes.....

Brushing Location..... Washing Location.....

Pleural fluid

History

Occupation..... Smoking Asbestos exposure

Previous: Histology Cytology

Is there a non-lung primary lesion? Yes Previous Current No

Previous treatment: No Yes neoadjuvant chemo/radiotherapy

Previous surgery: Yes No

Additional information

Clinical

Presentation.....

Paraneoplastic syndromes

Imaging & Findings:

X-Ray CT PET MRI Other

Lung lesion;

Single Multiple

Central peripheral

Lobe involved..... Size

Type: Spiculated Cavitation Scar

Solid Ground glass mixed solid ground glass

Obstructive features

Involves: Pleura Lymph nodes

Bronchoscopic findings /report attached

Radiological Staging TNM.....

Additional information

Pleural lesion:

Medical Thoracoscopy findings /report attached

Suspect: Reactive Benign Mesothelioma Carcinoma

Right Left Bilateral

Pleural plaques Calcification

Chest drain

Lesion: Encasing lung Diffuse Nodular Localised

Effusion Type

Invading lung chest wall other

Additional information
